DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 23-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Wu (US Pat. 5,391,426) or Maples (US Pat. 6,395,383). The references are cited in the IDS filed on 2/22/2005.

Wu discloses an absorbing material, generally comprising a substrate and a coating on the substrate (see abstract). In one embodiment, the material comprises 6 layers in sequence: a backing layer, a pliable porous substrate, a gas blocking water vapor permeable polymeric coating, another pliable porous substrate, a polyurethane layer with activated carbon, and a covering layer of porous PETF (see col. 3, ln. 47-62). The composite is used as protective coverings (see col. 3, ln. 4-7).

Maples discloses a protective covering, comprising two adjacent polyamide layers 20, two substrates 23, 23a, two adhesive layers 24, 24a, and two backings (carriers) 25, 25a (see Fig. 19). The adhesives are polyurethane. The carriers are made of fabric (sheet-like). The substrates are water vapor permeable and can be polyurethane or cellulosic (see col. 12, ln. 25-48; col. 7, ln. 57-62).
